Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. ClaimS 1-3,5-15,22-23,25-26 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Capuani (4478378).

Capuani in figure 6 the nozzle and wing arrangement and in col 4 discusses the operation thereof.

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 4,16-21,24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Capuani (4478378) in view of Pellissier (1795035).

Application/Control Number: 10/730,357

Art Unit: 3644

It would have been obvious to one having ordinary skill in the art at the time the invention was made to pivot the engine of Capuani to deflect the jet as it is an obvious substitute for pivoting and nozzle and further taught by Pellissier.

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
